Dear Customer,

In response to your inquiry, following is PTC's statement on the "Mercury-free" status of products from any PTC Alliance LLC. subsidiary LLC., including Metal-Matic, LLC., and Enduro Industries, LLC.

Mercury is a naturally occurring element that may be found in materials and chemicals at trace levels. For this reason, PTC defines "mercury-free" as not having mercury at greater than detection limits of 0.001 wt. % for solids, and 0.001 mg/l for liquids.

PTC's steel tubing products are not produced using mercury or any mercury compounds. In addition, the product does not come into contact with mercury or mercury bearing compounds during manufacturing, inspection, and testing, at more than trace levels as defined above.

A handwritten signature in blue ink, appearing to read "Jeff McNeely", with a long horizontal stroke extending to the right.
