February 11, 2025

Dear Valued Customer,

In response to your inquiry, the following is PTC's statement on product compliance with the European Union's REACH Regulation (EC/1907/2006) and the related issues of Substances of Very High Concern (SVHCs) and the Substances of Concern in Products (SCIP) database. This statement applies to products from any PTC subsidiary LLC., including Metal-Matic, LLC., and Enduro Industries, LLC.

REACH REGISTRATION

PTC's steel products are classified as articles under the REACH regulations and are not subject to registration. They do not contain any substances intended for release, and therefore do not meet the Article 7.1 criteria that would require registration of their constituent substances.

REACH-SVHC CANDIDATE LIST FOR AUTHORIZATION

This SVHC statement is based on the February 11, 2025, revision of the European Chemical Agency's 242-substance candidate list for authorization. PTC's steel products do not contain any of the listed substances at other than possible trace concentrations below the 0.1 weight % declaration limit.

SCIP –SUBSTANCES OF CONCERN IN PRODUCTS

PTC's products do not contain any SVHC's, therefore there are no substances that require reporting to the EU's SCIP database.

A handwritten signature in blue ink, appearing to read 'Jeff McNeely', with a long horizontal stroke extending to the right.
